SUMMARY

Undergraduate student pursuing a degree in Software Engineering with a strong passion for cutting-edge technology. Eager to explore software development, I bring leadership, teamwork, and the ability to excel under pressure. My commitment to staying at the forefront of advancements drives my goal to contribute meaningfully to the dynamic field of computer systems.

EDUCATION

BSc (Hons) in Information Technology Specializing in Information Technology Sep 2022 - Present
Institution: Sri Lanka Institute of Information Technology (SLIIT)

GCE Advanced Level(2021)

Galahitiyawa Central College-Ganemulla

- Engineering Technology-S
- Science For Technology-S
- Information Technology-C

CERTIFICATIONS

- **Python for Beginners**
Issued by University of Moratuwa
- **Build a free website with WordPress**
Issued by Coursera
- **AWS SimuLearn: Computing Solutions**
Issued by AWS Training & Certification
Completion Certificate

SKILLS

- **Technical Skills:** Familiar with full-stack web development using the MERN stack (MongoDB, Express.js, React.js, Node.js). Gained hands-on experience in both frontend and backend development through academic projects and personal practice.
- **Programming Languages & Tools:** Proficient in Java, JavaScript, Python, and SQL. Comfortable working with modern development tools and environments such as VS Code, Git, Postman, Figma, and Android Studio.
- **Database Management:** Experience working with MongoDB and MySQL, including creating, querying, and managing databases.
- **IT Fundamentals & Support:** Solid understanding of Windows-based systems, software installation, basic troubleshooting, and system configuration tasks.
- **Problem-Solving & Logical Thinking:** Strong analytical skills with a practical approach to solving technical challenges in development and IT environments.
- **Teamwork & Communication:** Good interpersonal and communication skills, with experience working collaboratively on group projects and presenting technical work clearly.

PROJECTS

IT Project Management 3rd Year Project

- Associated with SLIIT
- Developed a comprehensive platform for managing the fruit supply chain, featuring full CRUD operations for fruit collection, grading, inventory, and orders. Integrated AI-powered fruit grading functionality and secure payment processing, enabling seamless interactions between customers and administrators.
- Platform-Visual Studio Code
- Language-Java Script/Python
- GitHub Link-<https://github.com/RP1999/Fruit-Managment-System>

Programming Applications and Frameworks 3rd Year Project

- Associated with SLIIT
- full-stack platform for sharing and discovering recipes, featuring Google authentication, full CRUD operations, media uploads, YouTube integration, advanced search, real-time notifications, and social features like liking, commenting, and sharing—all built with React.js, Java Spring Boot, and MongoDB for a seamless and secure user experience.
- Platform-Visual Studio Code
- Language-Java
- GitHub Link-<https://github.com/RP1999/Cooking-recipe-sharing-platform>

Mobile Application Development 2nd Year Project

- Associated with SLIIT
- The assignment evaluates students to create a task manager app with full CRUD operations.
- Platform-Android Studio,SQLite
- Language-Kotlin
- GitHub Link-<https://github.com/RP1999/Task-Manager>

Information Technology Project 2nd Year Project

- Associated with SLIIT
- This assignment involves students in developing and managing an ICT project based on a client's requirements. It includes identifying project goals, gathering client requirements, preparing project plans, and implementing the project while demonstrating various stages of completion. The module also familiarizes students with tools used for project management and code quality.
- Language-Java Script
- Platform-Visual Studio Code
- GitHub Link-<https://github.com/RP1999/Appointment-Managment-System>
